

Quarterly  
Engagement  
Report

October-December  
2022

# Human Rights, Mining, Drax, Renault, Mercedes, Chipotle

## LAPFF CONFERENCE

# LAPFF Conference 2022

LAPFF held its annual conference in Bournemouth this quarter with a heavy focus on human rights and climate. On the first afternoon, delegates heard from a Total representative about the company's decision to withdraw from Myanmar and from the Vale Chair about his company's efforts to move on from the 2015 and 2019 tailings dam disasters in Brazil. The LAPFF Chair also thanked a Brazilian communities' representative for hosting LAPFF's visit in August and September, and spoke with José Pugas of JGP Asset Management about his organisation's work with Vale, as well as on deforestation.

On the second day, the conference delegates heard from a range of asset managers about their experiences of working to implement sustainability in their operations. Moving onto climate specifically, engaging non-executive directors on the topic, and a panel on electric vehicles followed, along with a session on executive remuneration. There was a fascinating, if disturbing, session on the fall of FTX and a panel discussing the growing importance of the 'S' in ESG. An LGPS panel on 'levelling up' was followed by two sessions on the need for sustainable water use. The day ended with an update on shareholder resolutions requesting racial equity audits.

The final day of the conference opened with a recount of the Covid pandemic from Devi Sridhar, a University of Edinburgh professor who has been vocal about government and societal responses to the pandemic. She was followed by Nell McShane, who has written a book about sex discrimination and harassment against female flight stewardesses and their path to unionising. Brendan Curran from the Grantham Institute at the London School of Economics then spoke about the just transition to a zero-carbon economy. The day ended with a synopsis of the state of affairs globally by political editor and broadcaster, Robert Peston.

## COMPANY ENGAGEMENTS

### UN Forum on Business and Human Rights

In light of LAPFF's summer visit to Brazil, the LAPFF Chair, Cllr Doug McMurdo, was invited to speak on an investor panel at the 2022 UN Forum on Business and Human Rights in Geneva. He was joined by colleagues from Principles for Responsible Investment, Domini Impact Investments, and Business for Social Responsibility. Cllr McMurdo spoke about the need to engage with affected stakeholders, including communities affected by company operations, in order for investors to understand better the true value of their investments. He implored investors to do more on human rights as a matter of financial materiality.

### BHP

**Objective:** LAPFF attended a BHP webinar on the company's sustainability activities and met with CEO, Mike Henry, informing a position for a voting alert ahead of BHP's November AGM. The LAPFF Chair, Cllr Doug McMurdo, also met with the Australasian Centre for Corporate Responsibility (ACCR) to find out more about why the organisation filed three shareholder resolutions ahead of BHP's AGM.

**Achieved:** LAPFF issued a voting alert in favour of the ACCR resolutions, recommending that its members oppose the BHP Chair, Ken MacKenzie, and vote in favour of three shareholder resolutions aimed at improving the company's climate practices.

**In Progress:** While LAPFF was grateful to the CEO for meeting to discuss the shareholder resolutions put to the AGM, there is still concern that the company has denied a meeting on the Samarco tailings dam collapse that occurred in 2015. LAPFF is continuing to engage BHP on both human rights and climate, but the views of both parties diverge significantly at the moment.

Vale Chair, José Penido, speaking at the LAPFF conference

### Vale

**Objective:** One of LAPFF's main objectives with Vale is to have the company engage effectively with stakeholders affected by its operations. While Vale, and particularly the Chair, has remained open to engagement with LAPFF and other investors, LAPFF would still like to see the company engage more effectively with workers and communities affected by its operations.

**Achieved:** Vale Chair, José Penido, travelled to the LAPFF conference to speak in person to investors about Vale's work to provide adequate reparations and recover reputationally from the Mariana and Brumadinho tailings dam collapses from 2015 and 2019, respectively. LAPFF is therefore encouraged that the company is taking investor action seriously in respect of these disasters.

**In Progress:** It remains the case that the vast majority of houses in the

various resettlements need to be rebuilt for affected community members. These houses are among many other reparations that still need to be carried out to an acceptable standard. LAPFF also has continued to express concerns that the company is not yet engaging in a meaningful way with affected community members. Fulfilment of Vale's reparations obligations and establishing a process for effective engagement with all stakeholders therefore remain high priorities for LAPFF.

### Anglo American

**Objective:** Cllr McMurdo wrote to Anglo American Chair, Stuart Chambers, and offered to report back on his findings from speaking to communities in Brazil impacted by Anglo American operations.

**Achieved:** Mr Chambers appeared to be receptive to LAPFF's findings and requested more detailed information from LAPFF.

## COMPANY ENGAGEMENT

**In Progress:** LAPFF is in the process of compiling the detailed findings from the Brazil visit to share with Mr Chambers and his colleagues. After this process has been completed, LAPFF is planning to meet with Anglo American's technical staff to talk them through the findings.

### Glencore

**Objective:** Although LAPFF was keen to meet Anglo American, BHP, and Vale in relation to its Brazil visit, it wanted to share its findings and observations with other mining companies covered in LAPFF's mining and human rights report issued earlier this year. Therefore, Cllr McMurdo met with Glencore Chair, Kalidas Madhavpeddi, to talk about LAPFF's work in Brazil, to discuss concerns community members in Peru have raised about Glencore's activities in that country, and to discuss various bribery and corruption allegations against the company. Glencore's approach to climate was also discussed.

**Achieved:** For a number of years, LAPFF had requested that Glencore undertake an independent assessment of the company's internal controls. This request stemmed from an investor collaboration spearheaded by Sarasin when details of Glencore's business relationships in the Democratic Republic of Congo raised concerns of bribery and corruption. Although Glencore does not appear to have heeded this request, the company has now entered settlements in numerous countries in relation to various bribery and corruption allegations. It is hoped that these settlements will place internal control requirements on Glencore to prevent the occurrence of future problems in this area.

**In Progress:** LAPFF is hearing concerns from community members affected by Glencore's operations in Peru that are eerily similar to those LAPFF encountered in Brazil, Colombia, Mexico, Papua New Guinea, and elsewhere. Namely, communities allege that mining companies have polluted, and are continuing to pollute, their water. The companies respond by stating that the water is naturally polluted. LAPFF needs to investigate to understand what is happening in these situations.

### Rio Tinto

**Objective:** LAPFF has been pleased to see some progress made by Rio Tinto after the company's destruction of a 46,000-year-old cultural heritage site at Juukan Gorge, Australia. Rio Tinto has been particularly transparent about its challenges on both community relations and workplace culture. During the year, the company issued both a community engagement update and a workplace culture report by a reputed independent consultant that highlighted a range of practices that need to be improved at the company. LAPFF is keen to ensure that Rio Tinto is undertaking effective social and environmental impact assessments and that the company does not face the same problems in relation to reparations at Juukan Gorge that BHP and Vale are facing in relation to reparations for the Mariana tailings dam collapse in Brazil.

**Achieved:** LAPFF attended an ESG briefing for investors to discuss the company's new 'Communities and Social Performance (CSP) Commitments Disclosure Final Report'. Given Rio Tinto's description of increased cultural heritage assessments, LAPFF asked if the company has also committed to independent environmental and social impact assessments (ESIAs) as part of its CSP approach.

**In Progress:** Although it seems that there is a fair amount of external input into various assessments, LAPFF is concerned that the company does not have a consistent or coherent approach to ESIAs. The independent assessment at Panguna in response to the OECD National Contact Point complaint on this issue is apparently underway and is to be commended, but it is reportedly a one off. Acknowledging the expense and resources involved in this type of assessment, LAPFF would like to work with a range of mining companies to determine how it could be feasibly done much more widely.

### Drax

**Objective:** LAPFF has been increasingly concerned about the business model of Drax Group plc, which runs the UK's largest power plant at Drax in Yorkshire. Instead of coal, the plant burns imported wood pellets, mainly from North America. The concerns about sustainability flow from the burning of wood on such a scale, as well as the harvesting of wood, removing a near-term living carbon sink (trees) that can only be replaced over a long period.

**Achieved:** LAPFF requested a meeting with the chair of Drax Group. A meeting was held, and a comprehensive follow-up letter has been sent to the chair as a result.

**In Progress:** Because discussions are ongoing, further reporting and updates will occur in due course.

Drax Power Station

## COMPANY ENGAGEMENT

### Chipotle

**Objective:** LAPFF has been engaging with Chipotle on the company's approach to water stewardship for three years. The focus of the engagement has been to encourage the company to undertake a full value chain water risk assessment. After a period of heightened engagement with the company, LAPFF member Greater Manchester Pension Fund filed a resolution on this issue ahead of Chipotle's 2022 AGM. Following discussions between LAPFF and the company, an agreement was reached that would see the resolution withdrawn from the ballot. The withdrawal was conditional upon formal commitments being made relating to the company's water stewardship programme.

**Achieved:** LAPFF held a follow-up call with Chipotle to measure progress made against LAPFF's initial asks. In response to the resolution, the company has completed a materiality assessment covering ingredients, its supply chain and restaurants.

**In Progress:** Given the company now has a better understanding of the water-related risks facing the business, the next phase of the stewardship plan is to develop context-based targets that relate specifically to areas of the operations under high water stress. LAPFF will continue to work with the company to develop these goals.

### KLA

**Objective:** Given the investment risks associated with global warming LAPFF has been issuing climate change voting alerts focused on shareholder resolutions, including those seeking to ensure companies have 1.5°C aligned targets and transition plans.

**Achieved:** LAPFF issued a voting alert at US company, KLA, regarding a proposal for a report on net zero targets and climate transition planning. LAPFF recognised the work being undertaken by the company. However, given the risks posed by climate change and the need to disclose a strategy for addressing climate risk and carbon emissions (covering Scopes 1, 2 and 3 and targets aligned to

Rolls Royce production site

a 1.5°C trajectory) LAPFF recommended a vote in favour of the resolution. In the end, the resolution secured the backing of a quarter of the votes, sending a strong message to the board about what action a significant minority of shareholders want to see.

**In Progress:** LAPFF expects companies to reflect and respond to such results given the level of support from shareholders. LAPFF will continue to issue climate-related voting alerts in 2023.

### Rolls Royce

**Objective:** A meeting with Rolls Royce Chair, Anita Frew, was held to follow up on LAPFF's collaborative correspondence to FTSE All Share chairs requesting they set out the company's carbon transition strategy to investors and put an appropriate resolution to shareholders at the AGM.

**Achieved:** A meeting with the head of sustainability and others covered various aspects of business strategy, targets, governance and disclosure. LAPFF asked

## COMPANY/COLLABORATIVE ENGAGEMENT

if a timeline to commercialisation could be given for the company's development of electric prototypes for commuter aircraft and regional flights, noting that Norwegian airline Widerøe, that Rolls Royce has partnered with, has targeted 2025 for its first commercial launch. A separate meeting of the LAPFF Chair with Anita Frew, provided insight into the workings and chairing of the 13-strong board. Discussions on the company's carbon impact and transition plan made evident the emphasis placed on the development of new businesses and products.

**In Progress:** The LAPFF Chair again pressed for the board to put the transition plan to the AGM for shareholder approval. This may be considered too soon for the 2023 AGM but has not been ruled out for future AGMs.

### Responsible Mineral Sourcing

**Objective:** LAPFF has continued its engagement with electric vehicle manufacturers to gain a better understanding of how they are addressing the risks associated with sourcing the minerals they need to produce the batteries for their vehicles. LAPFF met with Renault and General Motors on this issue for the first time this quarter and with Mercedes for the second time.

**Achieved:** An overview of Renault's work on risk assessments for the minerals it sources and contingent reporting was discussed. LAPFF also raised the potential benefits of membership of the Initiative for Responsible Mining Assurance (IRMA).

The discussion with Mercedes provided an in-depth view of the work the company was doing with regards to risk assessment of minerals and some of the work the company was doing in the Democratic Republic of the Congo.

General Motors laid out new additions to its board and the skills they would bring in the transition to electric vehicles. The company also spoke about the aspirations it had with its risk assessment process, audit programme and its dialogue with suppliers on the IRMA.

**In Progress:** LAPFF is continuing to seek engagements with electric vehicle manufacturers, impressing upon them the benefits of transparent reporting and enhanced due diligence, whilst seeking to better understand what work companies are doing and how they are managing a just transition.

### Tesco

**Objective:** Following the military coup in Myanmar in February 2021, it has been widely reported that there has been a drop in human rights and labour standards throughout the country, with union leaders targeted, internet connections cut, wages withheld, and a lack of freedom of assembly for workers. Tesco announced a responsible exit from the country, concluding in May 2022. LAPFF sought a meeting with the company to discuss this responsible exit and gain insight into the company's global supply chain due diligence.

**Achieved:** When LAPFF met with Tesco, a range of factors for the company's withdrawal from Myanmar were discussed. The Ethical Trade Initiative's recommendations for responsible business in the garment sector arose as a point of reference. There was also a useful discussion about whether companies are able to maintain leverage over factories and the human rights situation on the ground with the Junta in power.

**In Progress:** LAPFF is continuing to

monitor a number of companies that have supply chain links to Myanmar and will likely seek meetings with those that are seeking to exit the country or have already done so to gain a broader picture of how companies are approaching a 'responsible exit'.

### COLLABORATIVE ENGAGEMENTS

#### Asia Transition Platform (MUFG, SMBC, Kasikornbank, J Power)

**Objective:** Meetings were held with Asian financial institutions and coal-exposed power companies in collaboration with investors in the Asia Transition Platform. Meetings with banks focused on strategies to anticipate regulatory developments, mitigate risks to capital and capitalise on investment opportunities. Engagement with J-Power followed up on LAPFF's voting recommendation for the 2022 AGM, advising support for a resolution requesting carbon emission reduction targets aligned with the goals of the Paris Agreement.

**Achieved:** Engagement with MUFG sought to elicit further details on the company's proposed transition plan. LAPFF executive member, Cllr Wilf Flynn, pressed particularly on ostensible support for ammonia co-firing in the power industry, given that it delays transition

Workers ride a ferry truck as they go to a factory in the morning in Yangon, Myanmar

# COLLABORATIVE ENGAGEMENT

Metal manufacturing and recycling

to renewables and may not provide much benefit due to marginal emission reductions and high costs relative to renewables.

At SMBC, progress was recognised since the last meeting, with the bank setting absolute reduction targets for the oil, gas and coal sectors. It appeared that targets for investment and underwriting were still under development.

A discussion with the President of Kasikornbank, Khun Krit Jitjang, focused on how to work with client companies and bring industry along, noting work undertaken with members of the Thai bankers' association. It appears that there is now no financing for new coal plants or expansion of existing ones.

A meeting with J-Power's Executive Vice President and Director, Hitoshi Canno, covered the company's target to achieve net zero for all operations. Critical points of discussion included a stable supply of electricity for the Japanese domestic market, and a roadmap on these issues.

**In Progress:** LAPFF intends to continue challenging J-Power's strategy to invest in carbon capture and co-firing, with the associated risk of being 'locked-in' to coal fired plants. Regular meetings continue with Asia Research and Engagement to determine company-specific coverage for 2023, including Chinese-listed companies.

## CA100+ ENGAGEMENTS

### Lyondell Bassell

**Objective:** LAPFF sought an update on the multinational chemical company's decarbonisation strategy, subsequent to Peter Vanacker having taken over as CEO in May.

**Achieved:** With the arrival of the new CEO, it appears that much work has been put into an overall review of company strategy, with low-carbon initiatives poised to be a major part of company growth going forward. The meeting provided initial feedback on progress against the CA100+ benchmark results, set out investor expectations on lobbying and explored

policy challenges facing the company and where there might be areas for collaboration. Company representatives noted that engagement with the investor group has helped to promote this low-carbon focus.

**In Progress:** On Lyondell Bassell's lobbying activities, the company discloses the trade associations it is part of but little else. It is hoped that more company policies will be disclosed by next March when the full revised company business strategy is due to be announced.

### ArcelorMittal

**Objectives:** LAPFF has undertaken a number of engagements with ArcelorMittal and wished to determine progress in implementing zero-carbon technologies, as well as press for shareholders to be able to endorse company initiatives through a 'Say on Climate' resolution at the AGM.

**Achieved:** ArcelorMittal has joined the Energy Transition Commission (a LAPFF request from 2019) and referred to the

## COLLABORATIVE ENGAGEMENT

Mission Possible Partnership's 'net zero steel' report which shows two thirds of the US\$5 trillion required to decarbonise the global steel industry is in enabling infrastructure for green hydrogen and renewable electricity. There was a discussion about the Science-Based Targets initiative to develop appropriate methodology for the steel sector. This approach differentiates between primary and secondary steelmaking. The latter is based on recycling scrap steel and accounts for about one-third of production. It is hoped that ArcelorMittal will issue its next climate report after the AGM so it appears there is no plan for a 'transition plan' resolution for the 2023 AGM.

**In Progress:** The company appears to have made progress in decarbonising primary steelmaking. The Inflation Reduction Act is spurring similar initiatives in the US. In Europe however, the pace of change appears to be slower.

### National Grid

**Objective:** A meeting with National Grid representatives sought to ascertain why the company is not aiming to align with proposed ambitious US state policy for the decarbonisation of heat, and to follow-up on requests around policy disclosure.

**Achieved:** In the meeting, as ever, the divergence between the US and UK businesses was apparent. The north eastern US states where National Grid operates have set policies for 100% electrification of households in the decarbonisation of heat by 2050. It appears that the company wishes to keep the benefit of existing gas infrastructure. Cllr Chapman attended the meeting and highlighted comments made by the company, which LAPFF shares, that there is no long-term future in gas and that the future is in electrification.

**In Progress:** Engagement continues to identify and unlock potential policy barriers for National Grid's decarbonisation strategy. LAPFF and other CA100+ investors are interested in partnering with the company in calling for the necessary policies that can unlock the barriers to fast and decisive climate action.

### Sarasin – Paris-aligned accounts

**Objective:** In conjunction with Sarasin, LAPFF co-signed correspondence to the audit committee chairs of Equinor, CRH, Air Liquide and Rio Tinto setting out investor expectations on 1.5°C aligned accounting and audit disclosures.

**Achieved:** This was a follow up to previous correspondence with the committee chairs, who were also provided with Carbon Tracker's assessment of the company's 2021 audited accounts. In all four cases, there has been evidence of progress. The most substantive was Equinor's accounts where there were additional notes to the accounts and a 1.5°C sensitivity analysis for Property, Plants and Equipment. This led to the identification of a potential impairment of \$11.4 billion, equivalent to just under 30% of reported 2021 equity.

**In Progress:** Correspondence with all four companies recognised inherent uncertainties in the transition to net zero, and responses were welcomed with a meeting offered to discuss the requests made.

### Investor Alliance for Human Rights (IAHR) – The Home Depot

**Objective:** LAPFF joined the Investor Alliance for Human Rights (IAHR) Uyghur Working Group earlier in 2022 as part of a collaborative effort in engaging companies with alleged Uyghur forced labour in their supply chains. Through this group,

LAPFF has taken the lead on The Home Depot, a company with alleged links to forced labour in its polyvinyl chloride (PVC) supply chain noted in the 'Built on Repression' report produced by Sheffield Hallam University.

**Achieved:** LAPFF met with The Home Depot in December after an initial letter was sent with multiple expectations. These expectations included asking the company to complete a mapping of its value chain both inside and outside of China. The objective of this mapping is to identify both direct and indirect business relationships that are connected to the East Turkestan/Xinjiang region. Other questions were raised around the company's audit programme, including issues with undertaking thorough audits in Xinjiang.

**In Progress:** LAPFF is continuing to participate in the IAHR's Uyghur working group and will look to follow up with The Home Depot in 2023 to ask further questions about the company's audit programme and mapping process.

### Principles for Responsible Investment (PRI) – Advance Human Rights Initiative

Over the course of the year, the PRI has been developing its [Advance](#) initiative for investors to promote corporate respect for human rights. The programme was launched at the annual PRI in Person conference this quarter. LAPFF has been assigned to investor groups engaging with Anglo American and Vale. Planning for these group engagements is already under way and will complement LAPFF's own work on human rights, as well as its collaborations through IAHR.

### Investor Alliance for Human Rights (IAHR) – Investor Statement on the Corporate Sustainability Due Diligence Directive

The PRI, Eurosif, and IAHR drafted an investor statement in relation to proposed changes to the EU's Corporate Sustainability Due Diligence Directive (CSDDD). The statement proposed five improvements, all of which align with LAPFF positions on human rights, corporate governance, supply chain, and climate. These proposed improvements

## COLLABORATIVE/POLICY ENGAGEMENT

are aimed at greater inclusion of financial companies and value chains, strengthening board responsibility for human rights and environmental due diligence (including through executive remuneration), and ensuring alignment with other corporate sustainability legislation within the EU. LAPFF signed onto this statement along with other investors.

### SHARE – Amazon Sign-On Letter

Canadian investor body, SHARE, circulated a sign-on letter to Amazon for investors to support. The letter followed a shareholder proposal at the company's AGM asking the Board of Directors to produce a report analysing how Amazon's current human rights policies and practices protect the rightful application of the fundamental rights of freedom of association and collective bargaining. The letter requested that the Board conduct an independent third-party assessment of Amazon's commitment, policies, practices on freedom of association to identify, address and prevent any misalignments with the ILO Declaration on Fundamental Principles and Rights at Work and the UN Guiding Principles on Business and Human Rights. LAPFF joined other investors in signing onto this letter.

## POLICY ENGAGEMENT

### All-Party Parliamentary Group for Local Authority Pension Funds

**Objective:** LAPFF supports the All-Party Parliamentary Group (APPG) for Local Authority Pension Funds, established to discuss the issues and concerns of local authority pension funds. The APPG hosted a meeting in October to discuss the issue of levelling up. Part of the government's levelling up agenda has been to encourage and support private investment into local areas. The levelling up white paper also highlighted the role that local authority pension funds could play and called for LGPS funds to invest 5% locally. Through this white paper, the UK Infrastructure Bank has been tasked with engaging LGPS funds on supporting local growth. The meeting provided an opportunity to discuss barriers facing funds to reaching a local investment target as well as the potential opportunities.

**Achieved:** At the meeting chaired by Clive Betts MP, Lord Jim O'Neill, Vice-Chair of the Northern Powerhouse Partnership, set out the role investment could play in supporting local growth and how some LGPS funds had backed Northern Gritstone, which is financing companies being spun out of northern universities. Kate McGavin, Policy and Strategy Director at the UK Infrastructure Bank, focused on risk appetite, green infrastructure opportunities and investment some local authority pension funds had already made. The meeting provided an opportunity to hear about what funds were doing and their focus on their fiduciary duties and securing returns.

**In Progress:** The APPG for Local Authority Pension Funds will continue to discuss relevant policy issues facing the LGPS.

### Party Political Conferences

**Objective:** LAPFF supports fringe events at political party conferences; they are an effective way to raise issues that LAPFF has been involved in with national politicians and among stakeholders. This year the focus of the meetings was on investing in a just transition, following the [launch of the report](#) into the issue by the LAPFF-supported APPG on Local Authority Pension Funds. The meetings provided the opportunity for LAPFF to highlight the work of the Forum on the just transition and take part in a discussion about the respective roles of government and investors.

**Achieved:** LAPFF held meetings at Labour, Conservative and SNP conferences, with the Liberal Democrat conference being cancelled due to the Queen's funeral. At the meetings, LAPFF highlighted why ensuring a just transition was important for investors, including reducing the risks of political resistance to climate action. LAPFF set out how it seeks to reduce risks for members by engaging companies on ESG issues and showcased the engagement work that it has undertaken on a just transition. LAPFF Executive representatives were able to discuss the issues with politicians from the respective parties and answer questions from the audience about the work of LAPFF.

**In Progress:** LAPFF will continue to be involved in discussions with national politicians given the importance legislation and regulation plays in shaping the environment in which LAPFF members operate.

### Government Taskforce on Social Factors

**Objective:** Since it was founded over 30 years ago, LAPFF has been engaging on social issues and highlighting the importance of social factors to investment value. Despite the importance of social risks to responsible investors, it has often not had as much attention as governance and environmental risks. LAPFF has sought to change this situation, including among policymakers by engaging them through events and responding to consultations. In June last year [LAPFF responded](#) to the Department for Work and Pensions' call for evidence on consideration of social risks and opportunities by occupational pension schemes. As part of the Government's response, it decided to establish a Taskforce on Social Factors and LAPFF was invited to be a member.

**Achieved:** The establishment of the taskforce is to be welcomed and hopefully marks greater emphasis on the social risks that LAPFF engages on, including around human rights and employment standards. It is testament to the work of LAPFF and its members on social issues that it has been invited to take part in the taskforce and shows the importance of engagement with policymakers.

**In Progress:** The taskforce is running for a year with the expectation that it will culminate in a final report with recommendations.

# ENGAGEMENT

## CONSULTATION RESPONSES

### LGPS Climate Governance and Reporting

In September, the Department for Levelling Up, Housing and Communities issued a consultation on [governance and reporting of climate change risks for LGPS funds](#). The proposals within the consultation would broadly align LGPS funds with the Task Force on Climate-Related Financial Disclosures (TCFD) requirements introduced for DWP regulated funds. LAPFF responded to the consultation welcoming the move and noting LAPFF's long support for TCFD reporting. [The response](#), based on LAPFF's policies and its Climate Change Investment Policy Framework, set out the Forum's positions on alignment with a 1.5°C scenario, the importance of a just transition, and called for further consultation on any guidance to funds that might be issued.

### CA100+ Benchmark

LAPFF's [response](#) to proposed amendments for the CA100+ benchmark provided input to several proposed amendments. For example, LAPFF supported a new indicator on climate solutions where the proposed definition was for technologies, infrastructure or other activities "which help displace

fossil fuels". Areas of concern included a new indicator citing 2050, which current indicators do not. LAPFF considers a 2050 focus to be unhelpful, as recent IPCC reports show the global carbon budget for remaining within 1.5°C is very likely to be used up well before then.

## WEBINARS

### IndustriALL Social Protection Webinar

IndustriALL and LAPFF joined forces to co-host a second webinar on the need for universal social protection. This webinar focused specifically on an ILO employee injury protection pilot project in Bangladesh. Representatives from brands H&M and Associated British Foods spoke about the reason that their companies see the need for this type of social protection. The Rana Plaza factory collapse in Bangladesh was cited as a catalyst for understanding why social protection is so important, but more brand support is needed (although there are fears of freeriding). It is hoped the pilot leads to long-term, permanent, systemic solutions. You can find a film with worker testimonials [here](#) and a brief from IndustriALL [here](#).
